SUMMARY

Final-year B.Tech (CSE – AI) student with strong communication and persuasion skills and a target-driven mindset. Quick learner, comfortable working with data, and confident in presenting ideas to people. Looking for a Business Development or Sales role where I can understand customer needs, offer the right solutions and contribute to the company's growth.

SKILLS

- **Technical Skills:** Python, Django, REST APIs, PostgreSQL, Pandas, MS Excel, Data Visualization
- **AI & Tools:** Generative AI, Prompt Engineering, LLM APIs, Firebase, Razorpay, Git & GitHub
- **Professional Skills:** Communication, Negotiation, Persuasive Speaking, Problem Solving, Teamwork

EDUCATION

Babu Banarasi Das University, Lucknow, India **Expected May 2027**

Bachelor of Technology in Computer Science and Engineering (AI)

- Active contributor in departmental technical activities and university events.

Oxford Public School, Gorakhpur, India **2023**

Class 12th (Senior Secondary) – CBSE

Oxford Public School, Gorakhpur, India **2021**

Class 10th (Secondary) – CBSE

INTERNSHIPS & TRAINING

CodSoft **Sep 2026**

Data Analytics Intern | Remote

- Analyzed structured datasets using Python to extract operational insights and identify trends useful for client targeting.
- Created structured data visualization reports and daily trackers to monitor performance and progress.
- Maintained accurate data pipelines relevant to lead tracking and business progress updates.

Grastech **2026**

Data Science and Artificial Intelligence Trainee | Lucknow, India

- Completed 1 month of professional on-site training focused on exploratory data analysis and project execution.
- Collaborated in a team environment to manage daily tasks, ensuring timely delivery of project modules and maintaining effective communication.

PRACTICAL PROJECTS

EduTech AI (AI-Powered Interactive Learning Platform) **2026**

Python, Django, Groq (Llama 3.1) API, Firebase Auth, Razorpay

- Built a full-stack EdTech platform that turns YouTube playlists (500+ videos supported) into interactive classrooms with AI summaries, quizzes, a Hinglish AI tutor and a Pomodoro focus room.
- Implemented multi-tier Razorpay subscriptions, Google login via Firebase and PDF certificates with a public verification link; deployed live on Render and Hugging Face with Neon PostgreSQL.

Smart Expense Tracker (AI WhatsApp Bot) **2026**

Django REST, Groq AI, WhatsApp Bot (Baileys), React Native, PostgreSQL

- Built an AI-powered expense tracker where users log expenses on WhatsApp in Hindi, Hinglish or English; Groq Llama 3.1 parses and categorizes each message into a dashboard entry.
- Developed the Django REST backend, web dashboard and React Native mobile app with automated reminders; deployed on Render with Neon PostgreSQL.

House Price & Brain Tumor Prediction Systems **2026**

Data Analysis, Classification, Regression

- Built prediction and classification models across datasets to evaluate pattern accuracy (processing over 1000 records).
- Showcases logical thinking, attention to detail, and the ability to translate data into actionable insights.

CERTIFICATIONS & LEADERSHIP

- **NSS Volunteer (Management & Technical Teams):** Handled event logistics and coordinated student volunteer groups for campus-level social initiatives; supported digital content and event-related tech support.
- **Soft Skill Program:** Learnovate Enterprises, BBD University (professional communication & client interactions).
- **Microsoft Azure AI Essentials Professional Certificate** – Microsoft & LinkedIn Learning
- **GenAI Powered Data Analytics Simulation** – Forage
- **Data Analytics Simulation** – Deloitte (via Forage)
- **AI and Cybersecurity Awareness** – TCS iON
