PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate specializing in Artificial Intelligence. Experienced in Python, data science, machine learning, and API development. Passionate about building scalable, intelligent applications with optimized performance. Seeking a Software Developer position to contribute to a high-performing engineering team.

TECHNICAL SKILLS

Programming Languages

Python, SQL, HTML5

Frameworks & Libraries

Django, scikit-learn, NumPy, Pandas, Matplotlib, OpenCV

Domain Knowledge

Artificial Intelligence, Data Analysis, Predictive Modeling, Machine Learning

Tools & Platforms

Git, GitHub, Docker, VS Code, Google Cloud Platform, PostgreSQL, Firebase

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering

Expected: May 2027

Babu Banarasi Das University, Lucknow, India

- Completed coursework in Data Structures, Artificial Intelligence, Machine Learning, Database Management Systems, and Python Programming with a 90% academic score.

EXPERIENCE

Data Science and Artificial Intelligence Trainee

2026

Grastech

- Completed 1 month of professional training focused on advanced data science methodologies and exploratory data analysis.
- Deployed 2+ machine learning projects and predictive models using modern deployment pipelines to analyze datasets.

PROJECTS

EduTech AI: Interactive Course & Learning Workspace

2026

Python, Django, Groq API (Llama-3.1), Firebase, Razorpay

- Built a high-fidelity EdTech SaaS platform utilizing a dynamic YouTube parser to instantly convert playlists (500+ videos) into interactive virtual classrooms.
- Integrated Groq API (Llama-3.1-8B) to generate textbook-level summaries and architectural flowcharts, with a conversational Hinglish tutor for localized learning.
- Implemented a Pomodoro focus room with a glassmorphism overlay and a dynamic certification engine that generates PDF graduation certificates.

ExpenseTracker: AI Smart Expense Coach

2026

Python, Django, Node.js, Groq API, PostgreSQL, Docker

- Engineered an AI-powered personal finance application featuring seamless WhatsApp integration via Node.js for real-time natural language expense logging.
- Integrated Groq LLMs (Llama 3.1) to parse multi-lingual transaction inputs and developed a gamified analytics dashboard utilizing Django and PostgreSQL.

House Price and Brain Tumor Prediction

2026

Python, scikit-learn, Pandas, OpenCV

- Engineered a house price prediction regression model processing over 1000 housing records across 12 independent variables.
- Programmed an automated brain tumor detection system leveraging classification algorithms to process MRI image features with over 92% model test accuracy.

Healthcare Management Dashboard

2026

Python, Django, Map Integration

- Designed a centralized healthcare platform managing 3 core user modules and relational database schemas.
- Integrated an interactive artificial intelligence assistant and map routing component to support quick facility location and handle 10 distinct appointment workflows.

Digital Twin: Habit Prediction Application

2026

Python, Django, HTML5

- Developed a full stack behavioral tracking web application utilizing backend models to process 5 daily habit parameters and generate predictive insights.

CERTIFICATIONS

- Microsoft Azure AI Essentials Professional Certificate – Microsoft & LinkedIn Learning
- GenAI Powered Data Analytics Job Simulation – Forage
- Data Analytics Job Simulation – Deloitte (Forage)
- Technology Software Development Job Simulation – Forage
- AI and Cybersecurity Awareness – TCS iON

ACHIEVEMENTS

- Project Showcase (2026): Presented the IoT-based Smart Women Safety Device (featuring 3 hardware sensors) at the BBD University Technology Exposition.
